

ADHIL AHAMMED K

SOFTWARE DEVELOPER

adhilahammed0@gmail.com | +91 8592807756 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

- Ability to work as an individual as well as in group. collaboration with team members to implement new feature developments.
- Implemented robust error handling for network failures, ensuring uninterrupted user experience.
- Employed reusable components to streamline development, minimizing code duplication and enhancing maintainability.
- Developed mobile-first single-page applications with efficient design and smooth user interactions.

TECHNICAL SKILL

- | | | | |
|--------------|--------------|----------------|---------------|
| • Javascript | • Typescript | • HTML | • CSS |
| • React JS | • Next JS | • Tailwind CSS | • Redux js |
| • Node JS | • MongoDB | • Postgres | • Prisma(ORM) |

WORK EXPERIENCE

INFORMATION KERALA MISSION, TRIVANDRUM (GOVT)

React Developer

Jan 2025–Present

PRAXIO IT CONSULTING PVT LTD, COIMBATORE

Full Stack Developer

March 2023 – Sept 2024

- Led the seamless integration of APIs into the frontend, enhancing overall system functionality and user experience
- Collaborated effectively with cross-functional teams, providing valuable assistance and contributing to the overall success of project deliverables.
- One notable achievement was leading the development of an innovative application designed for the detection of traffic-violated vehicles.

GOSWIFT,BANGALORE

Frontend Intern

Nov 2022– Feb 2023

- Led the seamless integration of APIs into the frontend, enhancing overall system functionality and user experience
- Collaborated effectively with cross-functional teams, providing valuable assistance and contributing to the overall success of project deliverables.
- One notable achievement was leading the development of an innovative application designed for the detection of traffic-violated vehicles.

PROJECTS

Traffic Vehicle Detection System

- Developed and maintained frontend components for a Traffic Vehicle Detection System, enabling real-time listing of detected vehicles, total detections, and advanced filtering options based on vehicle number, tags, and other criteria.
- Implemented functionality to update detected vehicle details, ensuring data accuracy and integrity by allowing corrections for incorrectly identified vehicles captured by the system's cameras.
- Leveraged technologies such as React.js for the frontend, Node.js for backend development, and Prisma for database management, optimizing performance and scalability while adhering to industry best practices.

Service Provider App-BCUZE

- Contributed to the frontend development of a comprehensive service provider app, integrating multiple companies' services into a unified platform accessible to both tenants and customers, streamlining service requests and assignments. Designed and implemented
- user-friendly interfaces for customers to request services with deadlines and for tenants to efficiently assign tasks to technicians from different companies, enhancing operational efficiency and customer satisfaction.
- Utilized a tech stack including React.js, Next.js, Node.js, TypeScript REST APIs, and Prisma for database management, ensuring optimal performance, scalability, and adherence to modern development standards.

Prison App-Prison Bridge

- Implemented robust authentication systems across three distinct applications, ensuring secure access for inmates, their relatives, and administrative personnel, thereby safeguarding sensitive data and maintaining privacy.
- Contributed to the development of authentication mechanisms that facilitated seamless user authentication processes, enhancing user experience and system reliability within a complex application ecosystem.

EDUCATION

B-TECH MECHANICAL ENGINEERING

Govt Engineering College Thrissur
Kerala

2017 – 2021
